The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

The date of Key Information Memorandum is May 25, 2016.

Investment Objective

The investment objective of the Scheme is to generate returns through investments in debt and money market instruments with a view to reduce the interest rate risk. The scheme will invest in debt and money market securities, maturing on or before maturity of the scheme. There is no assurance that the investment objective of the Scheme will be achieved.

Asset Allocation Pattern of the scheme

The asset allocation under the Scheme, under normal circumstances, will be as follows:

Investments	Indicative Allocation (% to net assets)		Risk Profile
	Minimum	Maximum	
Debt Securities (excluding money market instruments)	80	100	Low to medium
Money Market Instruments	0	20	Low to medium
Government Securities	0	20	Low

Investment in Derivatives will be up to 50% of the net assets of the Scheme. The total gross exposure investment in debt + money market instruments + derivatives (fixed income) shall not exceed 100% of net assets of the Scheme.

The Scheme may take derivatives position (fixed income) based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the investment objective of the Scheme. These may be taken to hedge the portfolio, rebalance the same or to undertake any other strategy as permitted under SEBI (MF) Regulations from time to time.

The scheme will invest in repo of corporate debt securities.

The scheme shall not invest in any debt instruments/ papers issued by Tourism companies, Airlines Companies, Gems and Jewellery and unrated debt instruments

The scheme shall also not undertake securities lending, short selling and shall not invest in securitised debt, ADR/GDR, foreign securities and in Credit Default Swaps

Portfolio Rebalancing: Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions may vary substantially depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and only for defensive considerations. In case of any deviation, the AMC will achieve a normal asset allocation pattern within 30 days.

Where the portfolio is not rebalanced within specified days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objective of the Scheme.

Investment in CBLO before the closure of NFO:

In accordance with SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2016/42, dated March 18, 2016, the scheme may deploy the NFO proceeds in CBLO before the closure of NFO period. The appreciation received from investment in CBLO shall be passed on to investors. In case if the scheme is not able to garner the minimum subscription amount during the NFO period the interest earned upon investment of NFO proceeds in CBLO shall be returned to investors, in proportion of their investments, along-with the refund of the subscription amount. The AMC shall not charge any investment management and advisory fees on funds deployed in CBLOs during the NFO period.

Intended Portfolio for Scheme:

The intended Portfolio for the Scheme will be as under. **The Scheme will ensure adherence to the floors and ceilings within a range of 5% of the intended allocation (in %) against each sub asset class/credit rating.**

Instruments	Credit Rating					
	AAA	AA	A	A1+	BBB	Not Applicable
CDs	-	-	-	-	-	-
CPs	-	-	-	0%-5%	-	-
NCDs	-	95%-100%	-	-	-	-
Any other Instruments	-	-	-	-	-	-

Notes:

- Securities with Rating AA will include AA+ and AA-. Similarly, securities with Rating A will include A+ and A-.
- Positive variation in investment towards higher credit rating in the same instrument is allowed. In case of non availability of assets or taking into account the risk reward analysis of CPs/NCDs the scheme may invest in CDs having highest rating (A1+) & CBLOs/T Bills. Such deviation may exist till suitable NCD/CP of desired credit quality is not available. At the time of building of portfolio post NFO and just towards maturity, there may be higher allocation to cash and cash equivalents under each series of the scheme.
- All investments shall be made based on the ratings prevalent at the time of investments. However where there are dual ratings for a particular security, most conservative publicly available rating shall be considered.
- In the event of any deviations below the minimum limits or beyond the maximum limits, rebalancing of the asset allocation will be called for by the Fund Manager within the 30 days from the date of the said deviation. Such changes in the investment pattern will be for a short term and for defensive considerations and the intention being at all times to seek to protect the interests of the Unit Holders.
- The scheme shall not invest in any debt instruments/ papers issued by Tourism companies, Airlines Companies, Gems and Jewellery and unrated debt instruments
- The scheme shall also not undertake securities lending, short selling and shall not invest in ADR/GDR, foreign securities and in Credit Default Swaps.

There will be no variation between intended portfolio allocation and the final portfolio allocation except to the exception as mentioned in point (b) and (d) above.

Credit Evaluation Policy

The AMC has appointed an Investment Committee which oversees matters relating to credit assessments and approvals. The Investment Committee comprises of Senior Executives of the Company including a Director. It oversees the risk management function and sets the framework for credit risk assessment and monitoring, sectoral exposure caps, sensitive sector limits, fund level limits and norms for investment decision-making. This investment policy which emphasizes on credit quality, liquidity and duration management lays down the process to be followed by the debt fund management team while making investments. The broad process followed can be enlisted as under:

- Detailed credit research is undertaken for each investment in the portfolio which includes qualitative and quantitative assessment of various issuers.
- Qualitative assessment involves analyzing the business profile of the issuer on several parameters including market share, competitive positioning, management quality, business diversification, regulatory environment, rating agency views and event risk if any.
- Quantitative assessment involves analyzing the financial profile of the issuer on parameters like balance sheet size, cash flow adequacy, debt servicing capability, working capital requirements, funding flexibility and capital adequacy.
- Typical ratios used in credit analysis are debt to equity (leverage), short term debt to total debt, interest coverage ratio, total debt to EBITDA, current ratio, EBITDA margin and net profit margin.
- To ascertain exposure limits on the issuer, we consider the total debt outstanding for the entity and apply a certain percentage based on our internal grading criteria. The same is also restricted to a certain percentage of our own debt net assets. The investment limits so derived are strictly adhered to.

Investment Strategy

For the purpose of achieving the investment objective, the Scheme will invest in a portfolio of Debt and Money Market securities, maturing on or before maturity of the Scheme.

The AMC has an internal policy for selection of assets of the portfolio. The portfolio is constructed taking into account ratings from different rating agencies, rating migration, credit premium over the price of a sovereign security, general economic conditions and such other criteria. Such an internal policy from time to time lays down maximum/minimum exposure for different ratings, liquidity norms, and so on. Through such norms, the Scheme is expected to maintain a high quality portfolio and manage credit risk well.

Investments may be made in instruments, which, in the opinion of the Fund Manager, are of an acceptable credit risk and chance of default is minimum. The Fund Manager will generally be guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio.

Where will the scheme invest?		<p>The amount collected under the scheme will be invested only in debt and money market instruments and government securities. Subject to the Regulations, the amount collected under this scheme can be invested in any (but not exclusively) of the following securities/ debt instruments:</p> <p>a) Securities created and issued by the Central and State Governments and repo/or reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).</p> <p>b) Debt securities of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee (including but not limited to Indian Government Bond, State Development Loans issued and serviced at the Public Debt Office, Bonds issued by Central & State Government PSU's which are guaranteed by Central or State Governments)</p> <p>c) Corporate debt (of both public and private sector undertakings) including Non convertible debentures (including bonds) and non-convertible part of convertible securities.</p> <p>d) Money market instruments permitted by SEBI/RBI, having maturities of up to one year but not limited to:</p> <p>e) Certificate of Deposits (Cds).</p> <p>f) Commercial Paper (Cps)</p> <p>g) CBLO, Bills re-discounting, as may be permitted by SEBI from time to time.</p> <p>h) Repo of corporate debt securities</p> <p>i) Any other domestic fixed income securities as permitted by SEBI / RBI from time to time.</p> <p>j) Derivative instruments like Interest Rate Swaps, Interest Rate Futures, Forward Rate Agreements and such other derivative instruments permitted by SEBI/RBI.</p> <p>The securities/debt instruments mentioned above could be listed or unlisted, secured or unsecured, rated and of varying maturities and other terms of issue. The securities may be acquired through Initial Public Offerings (IPOs), secondary market operations, private placement, rights offer or negotiated deals. The Scheme may also enter into repurchase and reverse repurchase obligations in government securities held by it as per guidelines/regulations applicable to such transactions.</p>																																				
Risk Profile of the Scheme		<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>a) The portfolio of Kotak FMP Series 195 will comprise of securities issued by central and state government as also debt & money market instruments issued by corporates as mentioned under the paragraph 'Asset allocation pattern of the scheme'. All such securities will mature on or before maturity of the scheme. As the securities are held to maturity, the interest rate risk is significantly mitigated. The debt securities issued by the corporates do carry a credit risk as also the liquidity risk.</p> <p>b) The Scheme will invest entirely in Debt/ Money Market Instruments and Government securities. Liquidity in these investments may be affected by trading volumes, settlement periods and transfer procedures. These factors may also affect the Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain investment opportunities.</p> <p>c) Different types of securities in which the scheme would invest as given in the KIM carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry higher amount of risk than government securities. Further, even among corporate bonds, bonds, which are AAA rated, are comparatively less risky than bonds, which are AA rated.</p> <p>d) The market price of The portfolio of Kotak FMP Series 195, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV), and (2) demand and supply of units in the market. Sizeable demand or supply of the units in Exchange may lead to market price of the units to quote at premium or discount to NAV. Hence the price of the units is likely to hold significant variance (large premium or discount) from the latest declared NAV all the time.</p>																																				
Plans available		<p>There will be two plans under the Scheme namely, Regular Plan and Direct Plan</p> <p>Regular Plan: This Plan is for investors who wish to route their investment through any distributor.</p> <p>Direct Plan: This Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Fund and is not available for investors who route their investments through a Distributor.</p> <p>The portfolio of both the plans will be unsegregated.</p>
