Plan	Duration/ Tenure*	New Fund Offer Opens	New Fund Offer Closes
Reliance Dual Advantage Fixed Tenure Fund IX - Plan F	1150 days	July 21, 2016	August 02, 2016

\*The maturity period will be calculated from the date of allotment of units. However if the maturity date falls on a non working day, the succeeding working day shall be considered for the purpose of maturity date in the Scheme.

#### **INVESTMENT OBJECTIVE -**

The Scheme seeks to generate returns and reduce interest rate volatility, through a portfolio of fixed income securities that are maturing on or before the maturity of the Scheme along with capital appreciation through equity exposure. However, there can be no assurance or quarantee that the investment objective of the Scheme will be achieved.

#### **ASSET ALLOCATION PATTERN OF THE SCHEME:**

Instrument	Asset Allocation		Risk Profile
	Minimum	Maximum	
Debt Securities <sup>\$</sup> *	70%	95%	Low to Medium
Money Market Instruments**	0%	25%	Low to Medium
Equities & Equity related Instruments / Securities (including options premium)\$*	5% <sup>1</sup>	30%	Medium to High

\$\*Investments in Derivatives could be made as per applicable Regulatory guidelines including investments in Options. The option premium shall be for the purpose of exposure to derivative instruments which shall be restricted to long call options. The options premium offers the actual equity market exposure. In such cases, the total exposure related to option premium paid shall not exceed 20% of the net assets of the scheme. Moreover, this upper limit of 20%, for investments in options premium, if any, shall be applicable only at the time of investment. If due to market actions the value of options appreciates/depreciates resulting in breach of the limit of 20%, the fund manager may or may not rebalance the portfolio and may run with the ongoing exposure. However, if the fund manager sells the option before maturity, the reinvestment will be subject to maximum 20% limit as per the applicable duration on option premium. In case of debt Derivatives, it may be used to create synthetic fixed rate bond/ floating rate bonds. The cumulative gross exposure through repo transactions in Corporate debt securities along with equity, debt and derivative positions should not exceed 100% of the net assets of the scheme or guidelines as may be specified by SEBI from time to time. The gross exposure to derivatives in the equity segment shall be restricted as per the individual equity asset allocation tables mentioned above, however the same shall not exceed 30% of the net assets of the Scheme Moreover, it may be noted that the Debt derivatives would be used only for hedging and portfolio rebalancing".

The maturity of the securities (as mentioned in the asset allocation) will be on or before the maturity of the scheme. The scheme may, in the mean time, take exposure in equity and equity related instruments based on market conditions with an endeavor to seek capital appreciation.

\*\* The fund will try and invest in debt instruments of tenor closely matching the tenor of the scheme to maximize returns for investors and minimize reinvestment risk. However, on a temporary basis, allocation could be made to Money Market Instruments pending final deployment and based on the availability & attractiveness of matching maturity assets. Money Market Instruments may also be used for temporary deployment pending equity allocation and towards the end of the scheme tenor for deploying cash against maturing assets

The fund manager based on market conditions, may have a nil exposure in equities and equity related instruments. This would be done with the intent of capitalizing on the upside of equity returns and limit its downside. In case the Investment Manager is of the view that the risk-reward of investments in equity and equity related securities (including options premium & Equity Mutual Fund Units) is not in the best interest of the Unit holders at a given point in time, then the Investment Manager can deploy funds in Bank CDs (all not below the rating category AAA/A1+) / CBLOs/T-Bills / Government Securities /State Development Loans / Reverse Repos / Repo / Liquid schemes.

The Scheme will invest in Securitised Debt which may be upto 25% of the net assets of the scheme. The scheme will be engaging in repo in corporate debt subject to the provisions of the Intended Portfolio Allocation Table.

The Scheme shall not invest in Foreign Securities or engage in Short Selling. However scheme shall engage in securities lending for equity investments, in line with the SEBI (Mutual Funds) Regulations, 1996, Securities Lending Scheme, 1997, SEBI Circular No MFD/CIR/ 01/047/99 dated February 10, 1999, SEBI Circular No. SEBI/ IMD / CIR No 14/87175/2009 dated December 15, 2009, SEBI Circular No MRD/DoP/SE/Dep/ Cir-14/2007 dated December 20, 2007 notifying framework for short selling and borrowing and lending of securities and such other applicable guidelines as may be amended from time to time

The investment managers would have the flexibility to invest the debt component into floating rate debt securities in order to reduce the impact of rising interest rates in the economy. The scheme may invest in government securities, or securities which are supported by the Central or a State Government, up to the extent of its debt/money market allocation. The equity component of the scheme will primarily focus on companies that have demonstrated characteristics such as market leadership, strong financials and quality management, and have the potential to create wealth for their shareholders by delivering steady performance through the ups and downs of the market. The scheme will not invest in debt securities that may have a coupon or payout linked to the performance of an equity/equity index as an underlying (popularly known as 'equity related debentures'). Derivatives may be used to create synthetic fixed rate bond/floating rate bonds. Gross investments in securities under the Scheme which includes equities & equity related instruments/securities, debt securities Money Market Instruments and derivatives will not exceed 100% of the net assets of the Scheme.

RNLAM will ensure that total exposure of the scheme in a particular sector (excluding investments in Bank CDs, short term deposits of scheduled commercial banks, CBLO, G-Secs, SDLs, T-Bills and AAA rated securities issued by Public Financial Institutions and Public Sector Banks and such other instruments if any,as may be specified by SEBI from time to time) shall not exceed 25% or such other percentage of the net assets of the scheme, as prescribed by SEBI from time to time, unless the scheme has specifically

been exempted from the requirement by SEBI.

An additional exposure to financial services sector (over and above the limit of 25%) not exceeding 5% of the net assets of the scheme shall be allowed by way of increase in exposure to Housing Finance Companies (HFCs) rated AA and above and registered with National Housing Bank (NHB). However, such total investment/ exposure in HFCs shall not exceed 25% of the net assets of the scheme or such other percentage of the net assets of the scheme, as prescribed by SEBI from time to time.

Further, to clarify please note that all the above mentioned provisions and investments made in line with the above mentioned circumstances/variations are independent of this scenario.

Note: The sector classification shall be basis the data provided by Association of Mutual

Please note the above sectoral limit is not applicable for equity and equity related securities.

The AMC reserves the right to change the above asset allocation pattern in the interest of the investors depending on the market conditions for a short term period of defensive consideration. In case any deviation from the asset allocation, the fund manager will carry out rebalancing within 30 days. Where the portfolio is not rebalanced within 30 Days, justification for the same shall be placed before the Investment Review Committee and reasons for the same shall be recorded in writing. The Investment Review committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme."

The asset allocation tables given above should be read in conjunction with the detailed intended portfolio allocation tables and related conditions given for the scheme.

#### WHERE WILL THE SCHEME INVEST?

- Under the Scheme, the investment managers would have the flexibility to invest the
  debt component into both fixed rate debt securities and floating rate debt securities
  in order to reduce the impact of rising interest rates in the economy.
- 2. Derivatives (interest rate swaps and interest rate futures) may be used to create synthetic fixed rate bond/ floating rate bonds and to hedge the risk of changes in interest rates. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme. Subject to the limits as contained in Schedule VII to the SEBI (Mutual Funds) Regulations, 1996, the scheme reserves the right to invest it's entire allocation in debt and money market securities in any one of the fixed income security classes. Investments in rated fixed income securities will be in securities rated by at least one recognized rating agency. Investments in unrated securities will be made with the approval of the Investment Committee of RNLAM, within the parameters laid down by the Board of Directors of the AMC & the Trustees.
- 3. Money Market instruments includes commercial papers, commercial bills, treasury bills, Corporate Debt, Government Securities / State Development Loans having residual maturity up to one year, call or notice money certificate of deposit and any other like instruments as specified by the Reserve Bank of India from time to time. Short-term debt considerations for this Scheme includes maintaining an adequate float to meet anticipated levels of redemptions, expenses, and other liquidity needs.
- The Fund may also enter into "Repo", hedging or such other transactions as may be allowed to Mutual Funds from time to time.

In line with SEBI circular dated November 11, 2011 investments in corporate bond repo shall be made basis the policy approved by the Board of RNLAM and RCTC. The significant features are as follows:

- As specified in the SEBI Circular dated November 15, 2012, the base of eligible securities for mutual funds to participate in repo in corporate debt securities, is from AAA rated to AA and above rated corporate debt securities.
- ii. Category of counterparty & Credit rating of counterparty RMF schemes shall enter in lending via Repo only with Investment Grade counterparties (as required by SEBI Regulations) which are part of the approved debt universe (i.e. on which we have limits).
- iii. Restriction pertaining to tenor of Collateral For FMPs, the tenor of the collateral should expire before the maturity of the scheme. For other schemes, the collateral should comply with the maturity restrictions placed, if any, for those schemes in the Debt Investment Policy.
- iv. The Gross exposure of the scheme to repo transactions in corporate debt securities shall not be more than 10% of the net asset scheme. All investment restrictions stated above shall be applicable at the time of making investment
- v. Applicable haircut RBI in its circular dated November 09, 2010 had indicated the haircut to be applied for such transactions as follows:

S.No	Rating	Minimum Haircut
1	AAA	10%
2	AA+	12%
3	AA	15%

The above haircuts are minimum stipulated haircuts where the repo period is overnight or where the remargining frequency (in case of longer tenor repots) is daily. The RBI had earlier recommended a haircut of 25%. It is proposed that we maintain a minimum haircut of 15% for all repo contract of less than 3 months, and 25% for other contracts, unless a lower haircut is approved by the Investment Committee. The Fund Manager may refer to the rating-haircut matrix published by FIMMDA, to determine the appropriate haircut.

- i. The scheme does not intend to make any investments in Foreign/ Overseas Securities.
- The scheme intends to invest its assets in fixed income securities of Government of India and /or State Government to the extent of SEBI prescribed limits. Such

securities may be:

- i. Supported by the ability to borrow from the Treasury or
- ii. Supported by Sovereign guarantee or the State Government or
- Supported by Government of India / State Government in some other way.
   The above will depend upon the nature of securities invested.
- 7. The schemes may also enter into repurchase and reverse repurchase obligations in all securities held by them as per the guidelines and regulations applicable to such transactions. It is the intention of the scheme to trade in the derivatives market as per the Regulations.
- Securitised debt, pass through obligations, various types of securitisation issuances including but not limited to Asset Backed Securitisation, Mortgage Backed Securitisation, single loan securitisation and other domestic securitisation instruments, as may be permitted by SEBI / RBI from time to time.
- 9. The Scheme will invest in Equity and Equity related instruments of domestic companies / corporation including but not limited to convertible bonds and debentures and warrants carrying the right to obtain equity shares, Stock futures/index futures and other such permitted derivative instruments including options. The above-mentioned securities could be listed, unlisted, secured, unsecured, rated or unrated and may be acquired through initial public offerings, secondary market offerings, private placements, rights offers etc. To avoid duplication of portfolios and to reduce expenses, the Scheme may invest in any other schemes of the Fund to the extent permitted by the Regulations. In such an event, the AMC will not charge management fees on the amounts of the Schemes so invested, unless permitted by the Regulations. While it is the intention of the Scheme to maintain the maximum exposure guidelines provided in the table above, there may be instances when these percentages may be exceeded. Typically, this may occur while the Scheme is new and the corpus is small thereby causing diversification issues.
- 10. Investments may be in listed or unlisted debt instruments, as permitted under SEBI Regulations. These would cover secondary market purchases, Initial Public Offers (IPOs), other public offers, placements, rights offers, etc., subject to SEBI Regulations.
- 11. Investments in debentures, bonds and other fixed income securities will usually be in instruments, which have been assigned investment grade ratings by an approved rating agency. The instruments may be rated / unrated and listed / unlisted. In cases where the debt instrument is unrated, specific approval from the Investment Committee of RNLAM shall be obtained.
- 12. The scheme may invest in liquid schemes that invest predominantly in money market instruments / securities launched by RNLAM
- 13. The scheme will invest in the Equity Mutual Fund Units
- 14. Any other domestic fixed income securities as permitted by SEBI from time to time The Scheme will comply with the relevant investment restrictions mentioned in Schedule VII of SEBI (Mutual Funds) Regulations, 1996.

The final portfolio will depend on the availability and desirability of assets in terms of maturity profile, asset quality and yields. The portfolio formulation is a dynamic process and thus, an instrument which is attractive today may not be attractive tomorrow.

#### (i) CREDIT EVALUATION POLICY FOR INVESTMENTS IN DEBT SECURITIES

Credit evaluation is a continuous process. It applies not only for issuers where investments are being evaluated for the first time but also for those where we already have credit exposures.

In a detailed credit evaluation process, the following aspects are covered.

- An in-depth review of the sector in which company operates. In this process, research team also measures the micro and macro risks associated with the sector and its possible impact on the overall business environment of the issuer. In addition, issuer's market position is evaluated vis-à-vis competition.
- 2. Issuer analysis involves both qualitative and quantitative aspects.
  - a. Qualitative analysis is related to quality of management, corporate governance, promoter background, parents support etc. Any synergy / cross dependence with any of the other promoter companies is also scrutinized.
  - Quantitative analysis is related with balance sheet management, profitability indicators, ratio analysis, capex programmes, growth plans, leverage and cash management policy etc.
- The due diligence process involves both primary and secondary sources for research.
  - Secondary sources of information like publicly available data including annual reports and other public filings, rating and other research reports, industry research reports are studied in detail.
  - b. Primary research activities like direct interaction with the issuer at various levels, interaction with the rating agencies, the company's bankers, competitors in the industry and stock market participants (market intelligence), is given a very high weightage.
- 4. Both for plain vanilla transactions and especially for structured transactions, legal due diligence is an integral part of the overall risk evaluation policy. Depending on the scope and complexity of transactions both internal as well as external legal exercises are undertaken.

Based on the above analysis, the credit research team presents a case for investing / avoiding investments for any new issuer / structure. Post these discussions formal proposals are prepared for issuers / structures where limits are being sought.

The approval for such limits is sought, based on certain criterion that is laid out as part of the investment policy. Depending on the rating, tenor, and proposed exposures, approvals are taken at the Head of Fixed Income / Investment

Committee / Board levels.

As mentioned earlier, credit evaluation is a continuous exercise. For all issuers / structures where we have current exposures regular evaluation is carried out on a periodic basis. The periodicity of such evaluation depends on the exposurer, credit comfort on the said issuer / structure and the overall credit environment.

Apart from regular credit updates both internally and at the Investment Committee levels, the board is also appraised on a periodic basis, on all the credit exposures, their performance and the credit department's views on them going forward.

# (ii) LIST OF SECTORS WHERE RNLAM / RMF WOULD NOT BE INVESTING

The scheme will not invest in real estate sector and airline sector. This negative sector exposure is applicable for fixed income securities.

# (iii) TYPE OF INSTRUMENTS IN WHICH THE SCHEMES PROPOSE TO INVEST For the type of instruments in which the schemes propose to invest is detailed in point no. D (where will the scheme invest - Point No. 1 to 13)

#### (iv) INTENDED PORTFOLIO ALLOCATION

As per SEBI Circular No IMD/ DF/12 /2011 dated August 1, 2011 on Indicative portfolio or yield in close ended debt oriented mutual fund, the intended allocation for Reliance Dual Advantage Fixed Tenure Fund IX - Plan F is as mentioned below. The floors and ceilings within a range of 5% of the intended allocation (in %) against each sub asset class/credit rating as mentioned below:

Credit Rating Instruments	A1+	AAA	AA	А	BBB	N.A
CDs						
CPs						
Government securities / State Development Loans (SDLs)						30% - 35%
NCDs / Bonds			50% - 55%			
Securitised Debt						
*CBLO/ Reverse Repos Repos including repo in corporate bonds)/ T-Bills /Liquid schemes						0 - 5%

N.A - Not applicable

\*Some of the instruments may also be rated.

Net long positions in Interest Rate Futures will be taken as exposure to Government securities / AAA NCDs.

Considering the long duration tenure of the plans, the portfolio mix shall be predominantly in NCDs.

While some of the above-mentioned instruments may be rated, some others such as CBLO, Repo, etc, are not rated. Hence we have combined all these instruments under one category in the intended asset allocation and mentioned that the rating is not applicable to these instruments along with a foot note explaining that some instruments within the group may also be rated.

In addition to the above fixed income allocation, the scheme would also have investments in equity & equity related instruments (including options premium & Equity Mutual Fund Units) in the range of 5%-30% in line with the details mentioned as a part of the Asset Allocation Pattern of the said document.

In case the Investment Manager is of the view that the risk-reward of investments in equity and equity related securities (including options premium) is not in the best interest of the Unit holders at a given point in time, then the Investment Manager can deploy funds in Bank CDs (all not below the rating category AAA/A1+) / CBLOs/T-Bills / Government Securities / Reverse Repos (excluding repo in corporate bonds) / Repo (excluding repo in corporate bonds)/Liquid Schemes. The same will not form a part of the above intended portfolio allocation.

It may be noted that detailing of credit rating/instruments shall be made similar to the current format as indicated above.

There shall be no variations between intended portfolio allocation as may be issued at the time of launch and final portfolio except on account of the following:

1. The scheme shall endeavour to invest in instruments having credit rating as indicated above or higher.

As per SEBI circular CIR/MIRSD/4/2011 dated June 15, 2011, Modifier "+"(plus) or "-"(minus) can be used with the rating symbols as they reflect the comparative standing withinthe category. For eg: in case AA has been mentioned, it will include AA- as well as AA+. In case an instrument has more than one publicly available rating, the more conservative rating will be considered for the purpose of investment. If an instrument is rated A1+ it will be equivalent to AAA for the above matrix.

For external factors such as revision in credit rating of instruments, valuation of security, etc. It may be noted that

- All the investment rating etc will be considered at the time of making the investments only i.e at the time of deployment (for the purpose of comparison).
- Post deployment in case of subsequent rating action in any securities which leads to negative deviation from the intended asset allocation, the fund manager shall rebalance the portfolio within time period of 30 days to align it with the intended portfolio allocation provided such rebalancing

does not adversely impact the interest of the investors.

- In case desired maturity and credit quality CP/NCDs are not available or also
  on the basis of the risk reward analysis, the Plan(s) may invest in Bank CDs
  of highest rating (A1+ or equivalents)/ CBLOs/ Reverse Repos (excluding
  repo in corporate bonds) / T-Bills. Such deviation may continue till suitable
  instruments of desired credit quality are not available.
- 3. Further, the above allocation may vary during the tenure of the Plan. Some of these instances are: (i) coupon inflow; (ii) the instrument is called or bought back by the issuer (iii) in anticipation of any adverse credit event (iv) cash flow/cash balance of less than Rs 5 Cr e.t.c. In case of such deviations, the Plans may invest in Bank CDs (A1+ or equivalents) / CBLOs/ Reverse Repos (excluding repo in corporate bonds) / G-sec / T-Bills / Liquid schemes. Such deviation may continue till suitable instruments of desired credit quality are available. Incase where cash is generated in the above instances and is deployed in short term deposits, such deployment will only be for temporary parking in line with SEBI regulations.
- 4. In case of individual securities maturity prior to the maturity date of the scheme / Plan and at the time of construction of the portfolio, investments may be made in cash and cash equivalents such as CBLO, Repo (excluding repo in corporate bonds), T-Bills, Liquid Schemes, CDs and short term bank Deposits
- 5. In case where investments in any Unrated Instruments is indicated and if they are not available, the Plan(s) may invest in Bank CDs having credit rating indicated in the table above. The Plan shall not invest more than 10% of its NAV in unrated debt instruments issued by a single issuer and the total investment in unrated instruments shall not exceed 25% of the NAV of the Plan
- 6. RNLAM will ensure that total exposure of the scheme in a particular sector (excluding investments in Bank CDs, short term deposits of scheduled commercial banks, CBLO, G-Secs, , SDLs, T-Bills and AAA rated secretities issued by Public Financial Institutions and Public Sector Banks and such other instruments if any,as may be specified by SEBI from time to time) shall not exceed 25% or such other percentage of the net assets of the scheme.

An additional exposure to financial services sector (over and above the limit of 25%) not exceeding 5% of the net assets of the scheme shall be allowed by way of increase in exposure to Housing Finance Companies (HFCs) rated AA and above and registered with National Housing Bank (NHB). However, such total investment/ exposure in HFCs shall not exceed 25% of the net assets of the scheme or such other percentage of the net assets of the scheme, as prescribed by SEBI from time to time.

Further, to clarify please note that all the above mentioned provisions and investments made in line with the above mentioned circumstances/variations are independent of this scenario.

Please note the above sectoral limit is not applicable for equity and equity related securities.

7. The range as indicated in the intended portfolio allocation depending on the risk return profile of the portfolio and subject to the availability of the securities, the fund manager may increase the allocation for AAA rated securities, while ensuring range of other securities is proportionately adjusted.

It may be noted that the intended portfolio allocation will be determined at the time of launch of individual plan whereas the final portfolio for the purpose of determining deviations, if any, will be considered after 30 days from the allotment of each plan. Basis the same, RNLAM will report in the next meeting of Board of Directors of Reliance Nippon Life Asset Management Limited, (formerly Reliance Capital Asset Management Limited) (RNLAM) and Reliance Capital Trustee Co Limited the publicized percentage allocation and final portfolio.

Barring the instances/scenario as mentioned above, in case of any deviation between the intended portfolio allocation and actual portfolio allocation the Fund Manger shall review and rebalance the portfolio within 30 days failing which such deviations would be recorded in the minutes of the Investment committee meeting to be placed before the Board of Director and Trustees.

For unlisted / non traded securities, where sector classification does not exist, RNLAM will have the discretion to decide the classification as per their best judgment.

Pursuant to the SEBI Circular No. SEBI/IMD/CIR No. 1/91171 /07 dated April 16, 2007, where the cash in the scheme is parked in short term deposits of Scheduled Commercial Banks pending deployment, the scheme shall abide by the following guidelines:

- "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
- Such short-term deposits shall be held in the name of the Scheme.
- The scheme shall not park more than 15% of the net assets in short term deposit(s) of all the scheduled commercial banks put together. However, such limit may be raised to 20% with prior approval of the Trustee.
- Parking of funds in short term deposits of associate and sponsors scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
- The scheme shall not park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
- The scheme shall not park funds in short term deposit of a bank, which has invested in the Scheme.

RNLAM will not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

The fund management team will endeavor to maintain a consistent performance in the scheme by maintaining a balance between safety, liquidity and profitability aspects of various investments. The fund manager will try to achieve an optimal risk return balance for management of the fixed income portfolios.

The investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, they can be minimized by diversification and effective use of hedging techniques.

The fund management team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy, as well as developments in global markets.

Investment views / decisions will be taken on the basis of the following parameters:

- 1. Prevailing interest rate scenario
- 2. Quality of the security / instrument (including the financial health of the issuer)
- 3. Maturity profile of the instrument
- 4. Liquidity of the security
- 5. Growth prospects of the company / industry
- 6. Any other factors in the opinion of the fund management team

The equity portion of the scheme will invest in diversified portfolio of Equities & Equity Related Instruments (including options premium & Equity Mutual Fund Units) across market capitalisation. The fund manager may invest into equity & equity related instruments predominantly through long call options & Equity Mutual Fund Units

The funds will follow a bottom-up approach to stock-picking and choose companies across sectors. The Schemes will primarily focus on companies that have demonstrated characteristics such as market leadership, strong financials and quality management, and have the potential to create wealth for their shareholders by delivering steady performance through the ups and downs of the market. The Fund also expects to achieve the market linked appreciation (upside) by investing in premium of exchange traded options.

The Fund Manager may adopt different strategies considering the market scenario, and opportunities.

Risk Mitigation Factors /Risk Control: The Fund Management proposes to use analytic risk management tools like VAR / convexity/ modified duration for effective portfolio management.

#### RISK PROFILE OF THE SCHEME:

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

#### i) Schemes investing in Bonds:

Interest Rate Risk: As with all debt securities, changes in interest rates will affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise.

**Liquidity or Marketability Risk:** This refers to the ease at which a security can be sold at or near its true value.

**Credit Risk:** Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security).

Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested.

#### (ii) Risks associated with investing in Equities

Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.

The inability of the Scheme to make intended securities purchases and the the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme. Trading olumes, settlement periods and transfer procedures may restrict the liquidity of the investments. The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

Investments in equity and equity related securities involve high degree of risks and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

# (iii) Risks associated with Investing in Derivatives

- Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

#### (iv) Risk Associated with Securitised Debt

As with any other debt instrument, the following risk factors have to be taken into consideration while investing in PTCs:

a. Credit Risk

Since most of the PTCs are drawn from a cherry picked pool of underlying assets, the risk of delay / default due to poor credit quality is low. Further more most of the PTCs enjoy additional cashflow coverage in terms of subordination by another lower class of PTCs or in terms of excess cash collateralization.

b. Liquidity Risk

Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

#### c. Price Risk / Interest Rate Risk

The price risk of these instruments shall be in line with the maturity / duration of such instruments. Domestic Securitised debt can have different underlying assets and these assets have different risk characteristics. These may be as given in the following example:

Security 1 - Backed by receivables of personal loans originated by XYZ Bank Specific Risk Factors: Loss due to default and/or payment delay on Receivables, Premature Termination of Facility Agreements, Limited loss cover, Delinquency and Credit Risk,

Limited Liquidity and Price Risk, Originator/Collection Agent Risk, Bankruptcy of the Originator, Co-mingling of funds

Security 2 - Senior Series Pass Through Certificates backed by commercial vehicles and two-wheeler loan and loan receivables from ABC Bank Limited

#### (v) Risk factors associated with repo transactions in corporate bonds -

- The market for the aforesaid product is over the counter (OTC) and illiquid. Hence, repo obligations cannot be easily sold to other parties. If a counterparty fails, the scheme would have to take recourse to the collateral provided. If a counterparty fails to repay and the value of the collateral falls beyond the haircut, then the Scheme would be exposed to a loss of interest or principal
- Further, if the Scheme needs to take recourse to the debt securities provided
  as collateral, and the issuer of the debt securities makes a default, the scheme
  may lose the whole, or substantial portion of the amount. This risk is somewhat
  mitigated by the fact that only bonds which have credit rating of AA and above
  can be accepted as collateral for repo transactions.

#### (vi) Other Scheme Specific Risk factors

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme's investment portfolio, these periods may become significant. Please read the Sections of this Scheme Information Document entitled "Special Considerations" and "Right to Limit Redemptions" thereunder.

#### (vii) Risks associated with Listing of Units

Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV.

There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.

The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment

#### (IX) Risk associated with a close ended scheme

The tenor of the scheme shall be 1150 days from the date of allotment. The investor invests in such schemes with an expectation of generating wealth over the tenor of the scheme. The fund manager also invests funds as per the stated strategy keeping the above tenor in mind. While this allows the fund manager to take relatively long term investment calls without worrying about redemptions mid-way, in such schemes, the unit holder cannot exit the scheme before the maturity of the scheme, irrespective of changes in market conditions and alternative investment opportunities. Secondly, the stated strategy of the scheme may not be realized, within the tenor of the scheme. Other risk factors pertaining to the close ended schemes have been added under relevant sections

# (ix) Risk associated with Securities Lending (only to the extent of investment in equity segment)

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

#### Plans and Options

- (a) Growth Option
- (b) Dividend Payout Option

Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Fund (i.e. investments not routed through an AMFI Registration Number (ARN) Holder).

There is no assurance or guarantee as to the rate and frequency of dividend distribution. Dividend distribution is subject to availability of distributable surplus in the scheme. Trustees reserve the right to declare a Dividend during the interim period.

Investors are required to clearly indicate the plans/options in the application form of the respective Plan. In the absence of clear indication as to the choice of Option (Growth or Dividend Payout), by default, the units will be allotted under the Growth Option of the Plan.

Investor may note that following shall be applicable for default plan

Investors are required to clearly indicate the plans/options in the application form of the respective Plan. In cases of wrong/invalid/incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load. Similarly, in the absence of clear indication as to the choice of option (Growth or Dividend Payout), by default, the units will be allotted under the Growth Option of the default / selected plan of the series.

#### Applicable Net Asset Value

#### For Purchases including switch-ins:

The Units of each Plan of the Scheme will not be available for subscriptions / switch-in after the closure of NFO Period.

#### For Redemptions including switch-outs

No redemption/repurchase of units shall be allowed prior to the maturity of the scheme. Investors wishing to exit may do so by selling their units through stock exchanges. The scheme will come to an end on maturity date. On maturity of the Scheme, the outstanding units shall be redeemed and proceeds will be paid to the unit holders as a default mode which means that the units of the Scheme shall be fully redeemed on the date of maturity and redemption proceeds shall be dispatched to / credited in the bank account of the unitholders within 10 Business Days from the date of maturity

However, investor will have an option to switch out the redemption proceeds into any other scheme of Reliance Mutual Fund at the time of NFO application or on the Maturity of the Scheme. However, switch out facility will not be available for units held in dematrialised mode.

The trustees reserves the right to suspend / deactivate/freeze trading, ISIN of the scheme and do all such matters with respect to closure of the scheme at the time of maturity at any time ten days prior to the maturity. The proceeds of the maturity will be payable to the person whose names are appearing in the beneficiary position details of which will be received from depositories after the suspension /deactivation /freezing of ISIN.

Maturity proceeds would be payable to investors as per the bank details provided in beneficiary position details received from depositories.

However, once the units are dematerialised and the investor sells to another investor through exchange or transfers the units to another investor through DP then the maturity instruction provided by the existing investor will not be valid for the new investor. For the new investor the maturity proceeds shall be dispatched to the designated bank account of the unit holder within 10 business days from the date of redemption or repurchase, subject to availability of all relevant documents and details.

At the time of maturity of the scheme, if it is perceived that the market outlook is positive and investment in the similar kind of instruments is likely to fetch better returns for the investors, then in the interest of the Investors, the AMC may decide to roll-over the scheme.

The rollover of the scheme shall be subject to compliance with the provisions of regulation 33 (4) of the SEBI (Mutual Funds) Regulations, 1996. For more details, please refer Scheme Information Document.

Value of Investment at end of 1 year (Before Expenses)	112,000.00	
Value of Investment at end of 1 year (After Expenses)	110,940.00	

**Note:** Please note that the above is an approximate illustration of the impact of expense ratio on the returns, where the Gross NAV has been simply reduced to the extent of the expenses. In reality, the actual impact would vary depending on the path of returns over the period of consideration. Expenses will be charged on daily net assets.

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience but the total expenses shall not exceed the limits permitted by SEBI. Types of expenses charged shall be as per the SEBI (MF) Regulations. The purpose of the above table is to assist the investor in understanding the various costs and expenses that an investor in the scheme will bear directly or indirectly.

Mutual funds /AMCs may charge service tax on investment and advisory fees to the scheme in addition to the maximum limit as prescribed in regulation 52 of the SEBI Regulations. Service tax on other than investment and advisory fees, if any, shall be borne by the scheme within the maximum limit as per regulation 52 of the SEBI Regulations.

Mutual Funds/AMCs will annually set apart at least 2 basis points on daily net assets within the maximum limit as per regulation 52 of the SEBI Regulations for investor education and awareness initiatives.

"At least 10% of the TER is charged towards commission/distribution expense under

Regular Plan. The TER of the "Direct Plan will be lowered to the extent of atleast 10% of above mentioned distribution/commission expense which is charged in Regular Plan".

However, no Investment Management fees would be charged on RNLAM's investment in the Scheme. The Trustee Company, shall be entitled to receive a sum computed @ 0.05% of the Unit Capital of all the Schemes of RMF on 1st April each year or a sum of Rs.5,00,000/- whichever is lower or such other sum as may be agreed from time to time in accordance with the SEBI Regulations or any other authority, from time to time. The total expenses of the scheme including the investment management and advisory fee shall not exceed the limits stated in Regulation 52(6) which are as follows:

- (i) On the first Rs. 100 crore of the daily net assets 2.25%;
- (ii) On the next Rs. 300 crore of the daily net assets 2.00%;
- (iii) On the next Rs. 300 crore of the daily net assets 1.75%;
- (iv) On the balance of the assets 1.50%;

"The above expenses are fungible within the overall maximum limit prescribed under SEBI (Mutual Funds) Regulations, which means there will be no internal sub-limits on expenses and AMC is free to allocate them within the overall TER".

In addition to the limits specified in regulation 52(6), the following costs or expenses may be charged to the scheme as per new sub regulation 6A, namely-

- (a) Brokerage and Transaction costs incurred for the execution of trades may be capitalized to the extent of 0.12 per cent of the value of trades in case of cash market transactions and 0.05 per cent of the value of trades in case of derivatives transactions. Any payment towards brokerage and transaction costs incurred for the execution of trades, over and above the said 0.12 per cent and 0.05 per cent for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations, 1996. Any expenditure in excess of the said prescribed limit (including brokerage and transaction costs, if any) shall be borne by the AMC or by the Trustee or Sponsors.
- (b) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from such cities as specified by the Board from time to time are at least -
  - (i) 30 per cent of gross new inflows in the scheme, or;
  - (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from such cities is less than the higher of sub-clause (ii) or subclause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis:

Provided further that expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities.

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment;

The Fund will strive to reduce the level of these expenses so as to keep them well within the maximum limits allowed by SEBI.

Expenses on an ongoing basis will not exceed the maximum limits as may be specified by SEBI Regulations from time to time.

The recurring expenses incurred in excess of the limits specified by SEBI (MF) Regulations will be borne by the AMC or by the Trustee or the Sponsors.
