1. Investment Objective

Arbitrage Plan: To generate income through arbitrage opportunities between cash and derivative market and through investments in debt and money market instruments.

Debt Plan: To generate income through investments in Debt / Money Market Instruments and Government Securities maturing on or before the maturity date of the Plan.

However, there can be no assurance that the investment objective of the Scheme/ Plan(s) will be realized.

2. Asset Allocation Pattern of the Scheme

ARBITRAGE PLAN

Under normal circumstances, the asset allocation (% of Net Assets) of the Arbitrage Plan's portfolio will be as follows:

Type of Instruments	Allocation (% of total assets)		Risk Profile
	Minimum	Maximum	
Equity & Equity Related Instruments	65	90	Medium to High
Derivatives including index futures, stock futures, index options and stock options etc. [#]	65	90	Medium to High
Debt securities and money market instruments* and fixed income derivatives	10	35	Low to Medium

*Investment in securitized debt shall not normally exceed 35% of the net assets of the Scheme.

When adequate arbitrage opportunities are not available in the Derivative and equity markets, the asset allocation of the Arbitrage Plan's portfolio will be as follows:

Type of Instruments	Allocation (% of total assets)		Risk Profile
	Minimum	Maximum	
Equity & Equity Related Instruments	0	65	Medium to High
Derivatives including index futures, stock futures, index options and stock options etc. [#]	0	65	Medium to High
Debt securities and money market instruments* and fixed income derivatives	35	100	Low to Medium

*Investment in securitized debt shall not normally exceed 50% of the net assets of the Scheme.

[#] The exposure to derivative shown in the above asset allocation tables is exposure taken against the underlying equity investments and should not be considered for calculating the total asset allocation. The idea is not to take additional asset allocation with the use of derivative. The margin money deployed on these positions would be included in Money Market category. The Arbitrage Plan shall not have an exposure of more than 25% of its assets in ADR / GDR / foreign securities in accordance with guidelines stipulated in this regard by SEBI and RBI from time to time.

DEBT PLAN

Type of Instruments*	Allocation (% of total assets)		Risk Profile
	Minimum	Maximum	
Debt Instruments@, Government Securities & Money market instruments	0	100	Low to Medium

*The Debt Plan shall not have an exposure of more than 35% of its assets in foreign debt securities in accordance with guidelines stipulated in this regard by SEBI and RBI from time to time. Investment in securitized debt, if undertaken, would not exceed 75% of the net assets of the scheme. The total gross exposure through investment in debt + money market instruments + derivatives (fixed income) shall not exceed 100% of net assets of the Scheme. Security wise hedge positions using derivatives such as Interest Rate Swaps, Futures, etc. will not be considered in calculating above exposure.

@Includes CDs issued by All-India Financial Institutions permitted by RBI from time to time.

Regulations from time to time. The cumulative gross exposure through debt, equity and derivative positions shall not exceed 100% of the net assets of the scheme in accordance with SEBI Cir/IMD/DF/11/2010 dated August 18, 2010. Derivative exposures for hedging purposes will not be considered in calculating above exposure.

The total exposure related to option premium paid shall not exceed 20% of the net assets of the Arbitrage Plan. Moreover, this upper limit of 20%, for investments in options premium, if any, shall be applicable only at the time of investment. If due to market actions the value of options appreciates/depreciates resulting in breach of the limit of 20%, the fund manager may or may not rebalance the portfolio and may run with the ongoing exposure. However, if the fund manager sells the option before expiry of the contract, the reinvestment, if any, would be subject to the maximum 20% limit on options premium.

The net assets of the respective Plans will be invested in hedged equity and/or Debt/ Money Market Instruments and Government Securities maturing on or before the maturity date of the respective Plans.

The investment in derivatives will also mature on or before the maturity date of the respective Plans.

Subject to the above, the respective Plans intends to enter into repos/ reverse repos (other than Corporate Debt Securities) as may be permitted by RBI. A part of the net assets may be invested in the Collateralised Borrowing & Lending Obligations (CBLO) or repo or in an alternative investment as may be provided by RBI to meet the liquidity requirements.

Pending deployment within reasonable time period and towards the maturity of the Scheme /Plans:

- The monies may be kept in cash and cash equivalents viz. overnight investment in CBLO, reverse repo, money market instruments, liquid and money market mutual fund schemes.
- The AMC may park the funds of the respective Plans in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as amended from time to time.

The Plans under the Scheme shall have a tenure of 1136 days from the date of allotment of units. If the Maturity Date falls on a non-Business Day, then the immediately succeeding Business Day shall be considered as the Maturity Date.

Intended Portfolio Allocation for Debt Plan

The Debt Plan will invest in securities as per the intended allocation indicated below against each sub class of asset for debt and money market instruments in accordance with SEBI Circular No. Cir/IMD/DF/ 12/2011 dated August 1, 2011 as amended from time to time:

(% of Net Assets)

Instruments	Credit Rating		
	A1+	AA	Not Applicable
Debt and Money Market Instruments			
Certificate of Deposit (CDs)	0-5	-	-
Commercial Papers (CPs)	0-5	-	-
Non - Convertible Debentures (NCDs)*	-	95-100	-
Government Securities/ Treasury Bills	-	-	0-5
CBLO/ Reverse Repos/ Units of debt or liquid mutual fund schemes	-	-	0-5

*Includes CDs issued by select All-India Financial Institutions permitted by RBI from time to time.

Notes:

- The ratings indicated in the above table include “-” and “+”. For eg. the AA rating shall also include AA- and AA+. Similarly, securities with Rating A1 shall also include A1+.
- All ratings will be considered at the time of investment. In case an instrument has more than one publicly available rating, the more conservative rating will be considered for the purpose of investment.
- Derivative instruments may also form part of the portfolio.

The total gross exposure through investment in debt + money market instruments + derivatives shall not exceed 100% of net assets of the Scheme. Security wise hedge positions using derivatives such as Interest Rate Swaps, Futures, etc. will not be considered in calculating above exposure.

- (d) Sectors in which the Plan shall not invest - The Debt Plan under the Scheme shall not invest in instruments issued by Gems & Jewellery and Airlines Companies.

There would be no variation between the intended portfolio allocation described in the above table and the final portfolio, subject to the following:

- (i) Deviation of the asset allocation in favour of higher rated instruments within the same instrument category to improve the portfolio credit quality. In case of any deviation from floors and ceilings of the intended allocation (%) against each sub asset class/ ratings indicated in the above table and subject to point no.(s) (ii) to (iv) mentioned hereinafter, the fund manager shall rebalance the portfolio from the date of such deviation with in a period of 30 days. However, the above allocation may vary during the duration of the Scheme in the following event: (a) occurrence of any adverse credit events such as rating downgraded/default; (b) due to market action, if the values of debt/ money market instruments appreciate/ depreciate. In case of such event, fund manager may rebalance the portfolio or continue to hold the instrument in the portfolio in the best interest of the unit holders.
- (ii) In case CPs / NCDs of desired credit quality are not available or the Fund Manager is of the view that the risk-reward analysis of such instruments are not in the best interest of the Unit holders, the Plan may invest in highest rated CDs viz. A1+ / CBLOs / Reverse Repos / T-Bills.
- (iii) At the time of building the portfolio post NFO and towards the maturity of the Scheme/Plan, the monies may be kept in cash and invested largely in cash equivalents / liquid/ money market schemes / shorter tenor CDs.
- (iv) During the tenure of the Debt Plan, the above allocation may vary due to instances like (a) coupon inflow; (b) the instrument is called or bought back by the issuer (c) in anticipation of any adverse credit event. In case of such deviations, the Plan may invest in highest rated CDs viz. A1+ / CBLOs / Reverse Repos / T-Bills. Such deviation may continue till maturity of the Scheme/Plan, if suitable CPs / NCDs of desired credit quality are not available.

3. Investment Strategy

ARBITRAGE PLAN

The primary objective of the Arbitrage Plan under the Scheme is to generate income primarily by employing various strategies which seek to exploit available arbitrage opportunities in markets and through investments in debt and money market instruments.

Arbitrage Opportunities

The market provides opportunities to derive returns from the implied cost of carry between the underlying cash market and the derivatives market. This provides for opportunities to generate returns that are possibly higher than short term interest rates with minimal active price risk on equities. Implied cost of carry and spreads across the spot and futures markets can potentially lead to profitable arbitrage opportunities.

Cash Futures Arbitrage: The scheme would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock. The Scheme will first buy the stocks in cash market and then sell in the futures market to lock the spread known as arbitrage return. Buying the stock in cash market and selling the futures results into a hedge where the scheme has locked in a spread and is not affected by the price movement of cash market and futures market.

The arbitrage position can be continued till expiry of the future contracts. The future contracts are settled based on the last half an hour's weighted average trade of the cash market. Thus there is a convergence between the cash market and the futures market on expiry. This convergence helps the scheme to generate the arbitrage return locked in earlier. However, the position could even be closed earlier in case the price differential is realized before expiry or better opportunities are available in other stocks.

Also, in case the Scheme has to unwind the positions prior to the expiry on account of redemptions or any other reason, the returns would depend on the spread between the spot and futures price at which the position is unwound.

ADR / GDR - underlying shares: In two-way fungibility, depository receipts can be converted into underlying domestic shares and local shares can be reconverted into depository receipts. The depository receipts could either be Global Depository Receipts (GDRs) or American Depository Receipts (ADRs). GDRs are listed on the London or the Luxembourg Stock Exchange, while ADRs are listed on the US exchanges like the New York Stock Exchange (NYSE) or the Nasdaq. Since every GDR / ADR has a given number of underlying shares, the number of shares qualifying for reconversion into GDRs / ADRs is limited to the number of shares, which were converted into local shares.

Say for instance that the ADR / GDR price is at a discount to the price of the underlying share. Converting the ADR / GDRs into the underlying shares can now result in a gain. If the ADR/GDR price is at a premium to the price of

the underlying shares, then it makes sense to re-convert the underlying shares into depository receipts. All this is subject to headroom or the availability of shares for re-conversion. Say for example a particular company has issued 10 million ADRs with one underlying share per ADR. Two million ADRs have been reconverted into local shares. Therefore two million local shares can be converted to ADRs. Here the intention is to capture the spread due to mis-pricing in ADR/GDR and the equivalent local shares, through simultaneous long or short positions.

Corporate Action / Event Driven Strategies

Any corporate action or event driven strategy where there is a potential opportunity for arbitrage in the cash and derivative markets such as:

- **Dividend Arbitrage:** Around dividend declaration time, the stock futures / options market can provide a profitable opportunity. Generally, the stock price decline by the dividend amount when the stock goes ex-dividend.
- **Buy-Back Arbitrage:** When the Company announces the buy-back of its own shares, there could be opportunities due to price differential in buyback price and traded price.
- **Merger:** When the Company announces any merger, amalgamation, hive off, de-merger, etc., there could be opportunities due to price differential in the cash and the derivative market.

DEBT PLAN

The primary objective of the Debt Plan under the Scheme is to generate income through investments in Debt / Money Market Instruments and Government Securities maturing on or before the maturity date of the Plan.

The Plan has the flexibility to invest in the entire range of debt instruments and would seek to minimize interest rate risk. The Plan may also seek investment opportunity in the Foreign Debt Securities, in accordance with guidelines stipulated in this regard by SEBI and RBI from time to time. The Plan would make investment in securities in the investment universe based on market spreads and liquidity, so as to match the investment horizon with the Plan's maturity. The investments would be based on interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data and trends in macro variables such as credit growth, liquidity, money supply growth, fiscal numbers and the global interest environment.

Though every endeavor will be made to achieve the objectives of the Scheme/ Plan(s), the AMC/ Sponsors/ Trustee do not guarantee that the investment objectives of the Scheme/ Plan(s) will be achieved. No guaranteed returns are being offered under the Scheme.

4. Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment. Scheme specific Risk Factors include but are not limited to the following:

(i) Related to Arbitrage Plan

The primary objective of the Fund Manager of Arbitrage Plan is to identify investment opportunities and to exploit price discrepancies in various markets. Identification and exploitation of the strategies to be pursued by the Fund Manager involve uncertainty. No assurance can be given that Fund Manager will be able to locate investment opportunities or to correctly exploit price discrepancies in the capital markets. Reduction in mis-pricing opportunities between the cash market and Future and Options market may lead to lower level of activity affecting the returns. As the Scheme proposes to execute arbitrage transactions in various markets simultaneously, this may result in high portfolio turnover and, consequently, high transaction cost.

There may be instances, where the price spread between cash and derivative market is insufficient to meet the cost of carry. In such situations, the fund manager due to lack of opportunities in the derivative market may not be able to outperform liquid / money market funds.

Though the constituent stocks of most indices are typically liquid, liquidity differs across stock. Due to heterogeneity in liquidity in the capital market segment, trades on this segment do not get implemented instantly. This often makes arbitrage expensive, risky and difficult to implement.

(ii) Risk factors associated with investing in equities and equity related instruments:

- Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis. Investments in equity shares and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risks.

(iii) Risk factors associated with investing in Fixed Income Securities

- The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market instruments, will be affected by changes in the

general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

- Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
- Investment in Debt instruments are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values.
- Investment in Debt instruments are subject to varying degree of credit risk or default risk (i.e. the risk of an issuer's inability to meet interest and principal payments on its obligations) or any other issues, which may have their credit ratings downgraded. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic and/ or political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values. This may increase the risk of the portfolio. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher level of risk than Government securities. Further even among corporate bonds, AAA rated bonds are comparatively less risky than AA rated bonds.
- As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- Apart from normal credit risk, zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity. If the issuer defaults, the Scheme may not obtain any return on its investment.
- **Prepayment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the Scheme to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the Scheme.
- **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

- **Settlement Risk:** Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

(iv) General Risk Factors

- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.
- At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities/ investments amounting to substantial reduction in the earning capability of the Scheme. The Scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- Securities, which are not quoted on the Stock Exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The Scheme may choose to invest in unlisted securities that offer attractive yields. Investment in such securities may lead to increase in the scheme portfolio risk.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.
- Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.
- Investment strategy to be adopted by the Scheme may carry the risk of significant variance between the portfolio allocation of the Scheme and the Benchmark particularly over a short to medium term period.

(v) Risk factors associated with investing in Foreign Securities

- **Currency Risk:**
Moving from Indian Rupee (INR) to any other currency entails currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee.
- **Interest Rate Risk:**
The pace and movement of interest rate cycles of various countries, though loosely co-related, can differ significantly. Hence by investing in securities of countries other than India, the Scheme stands exposed to their interest rate cycles.
- **Credit Risk:**
Investment in Foreign Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. This is substantially reduced since the SEBI (MF) Regulations stipulate investments only in debt instruments with rating not below investment grade by accredited/registered credit rating agency.
- **Taxation Risk:**
In addition to the disclosure related to taxation mentioned under section "Special Consideration" in the Scheme Information Document, Investment in Foreign Securities poses additional challenges based on the tax laws of each respective country or jurisdiction. The scheme may be subject to a higher level of taxes than originally anticipated and or dual taxation. The Scheme may be subject to withholding or other taxes on income and/or gains arising from its investment portfolio. Further, such investments are exposed to risks associated with the changing / evolving tax / regulatory regimes of all the countries where the Scheme invests. All these may entail a higher outgo to the Scheme by way of taxes, transaction costs, fees etc. thus adversely impacting its NAV resulting in lower returns to an Investor.

- **Legal and Regulatory Risk:**

Legal and regulatory changes could occur during the term of the Scheme which may adversely affect it. If any of the laws and regulations currently in effect should change or any new laws or regulations should be enacted, the legal requirements to which the Scheme and the investors may be subject could differ materially from current requirements and may materially and adversely affect the Scheme and the investors. Legislation/ Regulatory guidelines could also be imposed retrospectively.

- **Country Risk:**

The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

- To manage risks associated with foreign currency and interest rate exposure, the Mutual Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/ RBI from time to time.

- (vi) **Risk factors associated with investing in Derivatives**

- The AMC, on behalf of the Scheme may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- **Credit Risk:** The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.
- **Illiquidity risk:** This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.

- (vii) **Risk factors associated with investing in Securitised Debt**

The Risks involved in Securitised Papers described below are the principal ones and does not represent that the statement of risks set out hereunder is exhaustive.

- **Limited Liquidity & Price Risk**

There is no assurance that a deep secondary market will develop for the Certificates. This could limit the ability of the investor to resell them.

- **Limited Recourse, Delinquency and Credit Risk**

The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts to the Certificate Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of a Obligor to repay his obligation, the Servicer may repossess and sell the Asset. However many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realise the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

- **Risks due to possible prepayments and Charge Offs**

In the event of prepayments, investors may be exposed to changes in tenor and yield. Also, any Charge Offs would result in the reduction in the tenor of the Pass Through Certificates (PTCs).

- **Bankruptcy of the Swap Bank**

If the Swap Bank, becomes subject to bankruptcy proceedings then an Investor could experience losses or delays in the payments due under the Interest Rate Swap Agreement.

- **Risk of Co-mingling**

With respect to the Certificates, the Servicer will deposit all payments received from the Obligor into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of originator. If originator in its capacity as Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss.

- (viii) **Risk factors associated with close ended schemes**

- A close-ended scheme endeavors to achieve the desired returns only at the scheduled maturity of the Scheme. Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock exchange mode. For the Units listed on the exchange, it is possible that the market price at which the Units are traded may be at a discount to the NAV of such Units. Hence, Unit holders who sell their Units in a Scheme prior to maturity may not get the desired returns. Moreover, given the nature of the Scheme, the AMC may be required to liquidate the equity portfolio and the proceeds may be kept in cash and invested largely in cash equivalents/money market instruments towards the Maturity/ Final Redemption date and to that extent these investments made may not be in line with the asset allocation pattern.
- A close ended Scheme comes to the end at the scheduled maturity. On the scheduled maturity date, investors carry the risk that the value of underlying portfolio securities on the maturity date of the Scheme could get impacted by unfavourable market conditions and/or company specific events, which could lead to lower than desired returns.

- (ix) **Risk Factors associated with Market Trading**

- Although Units of the Scheme as mentioned in this Scheme Information Document are to be listed on the Exchange(s), there can be no assurance that an active secondary market will develop or be maintained.
- Trading in Units of the Scheme on the Exchange(s) may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading in Units of the Scheme is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the Scheme will continue to be met or will remain unchanged.
- Any changes in trading regulations by the Exchange(s) or SEBI may inter-alia result in wider premium/ discount to NAV.
- The Units of the Plans under the Scheme may trade above or below their NAV. The NAV of the Plans under the Scheme will fluctuate with changes in the market value of the Plans' holdings.

• Real Time Gross Settlement (RTGS)/National Electronic Funds Transfer (NEFT)

The AMC provides the facility of 'Real Time Gross Settlement (RTGS)' and 'National Electronic Funds Transfer (NEFT)' offered by Reserve Bank of India (RBI), which aims to provide credit of redemption and dividend payouts (if any) directly into the bank account of the Unit holder maintained with the banks (participating in the RTGS/ NEFT System).

NEFT is electronic fund transfer modes that operate on a deferred net settlement (DNS) basis which settles transactions in batches. Contrary to this, in RTGS, transactions are processed continuously throughout the RTGS business hours. The minimum amount to be remitted through RTGS is Rs. 2 lakhs. There is no upper ceiling for RTGS transactions. No minimum or maximum stipulation has been fixed for NEFT transactions.

Unit holders can check the list of banks participating in the RTGS / NEFT System from the RBI website i.e. www.rbi.org.in or contact any of our Investor Service Centres. However, in the event of the name of Unit holder's bank not appearing in the 'List of Banks participating in RTGS/ NEFT updated on RBI website www.rbi.org.in, from time to time, the instructions of the Unit holder for remittance of redemption/ dividend (if any) proceeds via RTGS / NEFT System will be discontinued by Fund/ AMC without prior notice to the Unit holder and the payouts of redemption/ dividend (if any) proceeds shall be effected by sending the Unit holder(s) a cheque / demand draft.

For more details on RTGS / NEFT or for frequently asked questions (FAQs) on RTGS / NEFT, Unit holders are advised to visit the RBI website www.rbi.org.in/Fund website www.hdfcfund.com

• Direct Credit

The list of banks is subject to change from time to time.

• Electronic Clearing Service (ECS)

Investors who have opted for the ECS facility of RBI for dividend payment will receive a direct credit of the due amount in the mandated bank account whenever the payment is made through ECS. A separate advice regarding credit of amount(s) via ECS will be sent to the Unit holder. It should be noted that while the Fund will make all efforts, there is no commitment that this facility will be

made available to all desirous investors.

Applicants in cities not covered under ECS facility will receive dividend payments, if any by cheques or demand drafts and the same will be mailed to the Unit holders. Please note that the ECS Facility is available only in respect of dividend payments and not in the case of Redemption of Units.

Therefore, in the absence of a specific request from the Unit holder exercising their choice of the mode of payment offered by the Fund from time to time, the payment of redemption / dividend proceeds shall be effected via the RTGS/ NEFT mechanism only.

Where this payment mode is not feasible / available, the payment of such proceeds will be made by DC / DD as may be feasible.

Unitholders are advised to opt for the NEFT / RTGS, as it helps in avoiding loss of dividend/ redemption warrant in transit or fraudulent encashment. Please update your IFSC and MICR Code in order to get payouts via electronic mode in to your bank account.

The AMC / Fund shall not be held liable for any losses/ claims, etc. arising on account of processing the direct credit or credit via RTGS/NEFT / ECS of redemption / dividend proceeds on the basis of Bank Account details as provided by the Unit holder in the Application Form.

However, if the Unit holders are not keen on availing of any of the said facilities and prefer receiving demand drafts, Unit holders may indicate their intention in the Application Form in the space provided specifically. The AMC/Fund would then ensure that the payouts are effected by sending the Unit holders a demand draft. In case of unforeseen circumstances, the AMC/Fund reserves the right to issue a demand draft.

Any charges levied by the investor's bank for receiving payment through electronic mode will be borne by the investor. The Mutual Fund / AMC will not accept any request for refund of such bank charges.

The Investor(s) should ensure that the amount invested in the Scheme is through legitimate sources only and does not involve and is not designated for the purpose of any contravention or evasion of the provisions of the Income Tax Act, Prevention of Money Laundering Act (PMLA), Prevention of Corruption Act and/ or any other applicable law in force and also any laws enacted by the Government of India from time to time or any rules, regulations, notifications or directions issued thereunder.

To ensure appropriate identification of the Investor(s) and with a view to monitor transactions for the prevention of money laundering, the Fund / AMC reserves the right to seek information, record investor's telephonic calls and or obtain and retain documentation for establishing the identity of the Investor(s), their beneficial ownership, proof of residence,

17. KNOW YOUR CUSTOMER (KYC) COMPLIANCE

a. KYC registered under KYC Registration Agency (KRA):

Units held in account statement (nondemat) form

It is mandatory for the Investors to quote the KYC Compliance Status of each applicant (guardian in case of minor) in the application and attach proof of KYC Compliance viz. KYC Acknowledgement Letter for all purchases/ switches/ registrations for Systematic Investment Plan (SIP)/ Systematic Transfer Plan (STP)/Flex STP/ Flexindex Plan/ Dividend Transfer Plan (DTP). Applicants intending to apply for units through a Power of Attorney (PoA) must ensure that the issuer of the PoA and the holder of the PoA must mention their KYC Compliance Status and attach proof of KYC Compliance at the time of investment.

SEBI has introduced a common KYC Application Form for all the SEBI registered intermediaries. New investors are therefore requested to use the common KYC Application Form and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds. The KYC Application Forms are also available on our website www.hdfcfund.com. Existing KYC compliant investors of the Fund can continue the practice of providing KYC Acknowledgement Letter/ Printout of KYC Compliance Status downloaded from CDSL Ventures Ltd. (CVL) website (www.cvllindia.com) using the PAN at the time of investment.

Once the investor has done KYC with any SEBI registered intermediary, the investor need not undergo the same process again with the Fund. However, the Fund reserves the right to carry out fresh KYC of the investor in its discretion.

Units held in electronic (demat) form

For units held in demat form, the KYC performed by the Depository Participant of the applicants will be considered as KYC verification done by the Trustee / AMC. In the event of non compliance of KYC requirements, the Trustee/AMC reserves the right to freeze the folio of the investor(s) and effect mandatory redemption of unit holdings of the investors at the applicable NAV, subject to payment of exit load, if any.

For further details, please refer Section 'Know Your Customer (KYC) Compliance' under Statement of Additional Information available on our website www.hdfcfund.com

SEBI required all the market intermediaries to update/ upload KYC details of the **new customer/ investors (not KYC-KRA compliant)** on CERSAI's online platform. CERSAI is a centralized repository of KYC records of customers/investors in the financial sector with uniform KYC norms and interusability of the KYC records across the sector with an objective to reduce the burden of producing KYC documents and getting those verified every time when the customer/investors creates a new relationship with a financial entity. Central KYC (CKYC) will store all the customer/ investor information at one central server that is accessible to all the financial institutions. After opening a KYC account under the CKYC, customer/investor will get a 14-digit identification number ("KYC Number") and that the same may be quoted by the investor wanting to invest in mutual funds. Further, the Mutual Fund/AMC is required to check whether the PAN of the investor has been updated in CKYCR. In case the PAN has not been updated, the Mutual Fund/AMC shall collect a self certified copy of the investor's PAN card and update/upload the same in CKYCR.

In case the Investor uses the old KRA KYC form for updating of any KYC information, such investor shall be required to provide additional/missing information only by using the supplementary CKYC form or fill the new "CKYC form".
