Key Information Memorandum

	<ol style="list-style-type: none"> 2. Securities with rating A and AA shall include A+ and A- & AA+ and AA- respectively. 3. All investment shall be made based on the rating prevalent at the time of investment. However, in case of an instrument having dual ratings, the most conservative publicly available rating would be considered. 4. Scheme can invest in same instruments having higher credit rating than the credit rating indicated in the above table. 5. In case of non-availability of and taking into account the risk-reward analysis of CPs, NCDs (including securitized debt), the scheme may invest in CDs of highest ratings (A1+) (public sector banks as well as private sector banks), TBills, CBLO & Repos on Government Securities / Tbill. Such deviation may exist till suitable NCD/CP of desired credit quality are not available. 6. At the time of building up the portfolio post NFO and towards the maturity of the scheme, there may be a higher allocation to cash/cash equivalents. 7. Further, the allocation may vary during the tenure of the Scheme. Some of the instances are : (i) coupon inflow; (ii) the instrument is called or bought back by the issuer (iii) in anticipation of any adverse credit event. Such deviations may exist and in case of such deviations the Scheme may invest in CDs having highest rating/ CBLOs /Tbill/ Reverse Repos and Repo in Government Securities / T Bills. 8. In the event of any deviations from the floor and ceiling of credit ratings specified for any instrument, the scheme portfolio will be rebalanced within 30 days from the date of said deviation. 9. There shall be no deviation between the intended allocation and actual allocation post the New Fund Offer period, except for the situation stated in (4), (5), (6) and (7) above. <p>List of Sectors the Scheme would not be investing:- Scheme will not invest in real estate sector & airlines sector.</p>
Investment Strategy	<p>Fixed Income / Debt Investments:</p> <p>Investments in fixed income / debt investments would be made only in securities which will mature on or before the date of the maturity of the Scheme. Scheme will invest in the fixed income / debt securities with a view to hold them till the maturity. The scheme has the flexibility to invest in the entire range of debt instruments. The issuer selection for credit exposure would be based on financial parameters such as Turnover, Net Worth, Gearing, Interest Coverage Ratio and Profitability track record. Companies in the investment universe are initially screened on the basis of Management quality, Business and Industry analysis & Feedback from creditors/ Rating agencies. Companies which meet the initial screening norms are then evaluated on the financial norms for consideration in the investment. The scheme would make investment in securities in the investment universe based on market spreads and liquidity, so as to match the investment horizon with the scheme maturity. Investment in sovereign papers would be based on interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data and trends in macro variables such as credit growth, liquidity, money supply growth, fiscal numbers and the global interest environment.</p> <p>Equity & Equity related instruments:</p> <p>The equity portion of the scheme will invest in diversified portfolio of Equities & Equity Related instruments. The Scheme will follow a mix of bottom-up & top-down approach to stock-picking. The Scheme will primarily focus on companies that have demonstrated characteristics such as market leadership, strong financials and quality management.</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <ol style="list-style-type: none"> a. SBI Dual Advantage Fund Series XXV will be investing in debt instruments, Government Securities and money market instruments (such as term/notice money market and reverse repos), Equity and equity related instruments including derivatives. Trading volumes and settlement periods inherently restrict the liquidity of the scheme's investments. In the event of a restructuring of the scheme's investment portfolio, these periods may become significant.

	<ul style="list-style-type: none"> b. Investment in Debt and money market instruments is subject to credit risk, liquidity risk, interest rate risk, reinvestment risk etc. c. Investment in securitised debt is subject to liquidity risk, limited recourse risk, Delinquency & Credit Risk, Risks due to possible prepayments, risk due to bankruptcy of the Originator or Seller etc. d. Equity and Equity related instruments are volatile in nature and are subject to price fluctuations on daily basis. e. Risk associated with derivatives: Since investments would be made in derivatives such as options & futures, the risks associated with such derivatives would be applicable. f. Risk associated with Stock Lending: If the Scheme undertakes stock lending under the regulations, it may be exposed to the risks inherent to securities lending, including the risk of failure of the other party g. Risk associated with Close Ended Scheme: It is possible that the market price at which the units are traded on the exchange may be at a discount to the NAV of such Units and investor may not get the desired return. Also there may not be sufficient liquidity on the stock exchange for the investors to exit from the stock exchange mode. h. Risk factors associated with repo transactions in corporate debt securities: Corporate Bond Repo transactions are currently done on OTC basis and settled on non-guaranteed basis. Credit risks would arise if the counter party fails to repurchase the security as contracted. This risk is largely mitigated, as the choice of counterparties is largely restricted and also haircuts are applicable on the underlying bonds depending on credit ratings. Also operational risks are lower as such trades are settled on a DVP basis.
Risk Control	<p>Investments in debt, money market instruments and equity and equity related securities including derivatives, carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification.</p> <p>In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants</p> <p>For risk control, the following may be noted:</p> <p>Liquidity risks:</p> <p>The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.</p> <p>Interest Rate Risk:</p> <p>Changes in interest rates affect the prices of bonds as well as equities. If interest rates rise the prices of bonds fall and vice versa. Equity might be negatively affected as well in a rising interest rate environment. A well-diversified portfolio may help to mitigate this risk. Additionally, the fund will invest in securities maturing on or before the maturity of the fund. Hence, while the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.</p>

Key Information Memorandum

	<p>Credit Risks: Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.</p> <p>Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification. Further, the Scheme will invest in a basket of debt and money market securities maturing on or before maturity of the Scheme with a view to hold them till the maturity of the Scheme. To that extent the Volatility risk will be mitigated in the scheme.</p>
Credit evaluation policy &	<p>due diligence for credit risk</p> <p>a) CREDIT EVALUATION POLICY</p> <p>Credit Analysis is a bottom up approach starting with looking at each individual issuer, industry, terms and covenants of a particular issue, etc. Individual issuer level exposures are taken only after approval from investment committee, i.e. issuer becoming part of "Accepted Credit Universe". A team of credit analyst will do a detailed analysis and prepare an initiation note to introduce an issuer to the universe. For every issuer we focus on 4 Cs of credit - Capacity, Character, Collateral & Covenants</p> <p>Key focus areas are:</p> <p>Management Quality, Financial Analysis, Business Analysis, Industry Analysis, Regulatory Environment, Feedback from Creditors, Other Issues; auditor report and qualifications, etc</p> <p>Regular management interaction at various levels, supported by plant visits, interaction with rating agencies is part of the process.</p> <p>Once a credit limit is set, it is regularly monitored based on internal Tier classification.</p> <p>b) DUE DILIGENCE FOR CREDIT RISK</p> <p>While carrying out due diligence for credit risk, following parameters/attributes are analysed:</p> <ul style="list-style-type: none"> • Management Quality - It includes assessment of management quality, reviewing promoter background and track record, performance of group companies and possibility of group support, internal control systems, succession plans & repayment track record including that of other companies in the group. • Financial Analysis - It includes analysis of Balance sheet, Profit and Loss account, and cash flow statement.
