INVESTMENT STRATEGY:

India is the second most populated country in the world with a population of over one billion. And it is set to reap what is now famously called the demographic dividend; its working age population being larger than the population that is dependent on it. 65% of the population in India is below 35 years of age (Census 2011). With Western Europe, the US, South Korea, Japan and even China's aging population, India could reap the reward of demographic dividend. IMF has stated in its report that India could add a significant pace to its GDP growth rate due to demographic dividend.

India hit ten-year high and stood first among the 63 nations surveyed in the global consumer confidence index with a score of 136 points for the quarter ending December 2016.

Global corporations view India as one of the key markets from where future growth is likely to emerge. The growth in India's consumer market would be primarily driven by a favourable population composition and increasing disposable incomes.

India's robust economic growth and rising household incomes are expected to increase consumer spending to US\$ 4 trillion by 2025.

By 2025, India would rise from the 12th to the 5th largest position in the consumer durables market in the world. The consumer durables market in India is expected to reach US\$ 20.6 billion by 2020. Demand growth is likely to accelerate with rising disposable incomes and easy access to credit. Increasing electrification of rural areas and wide usability of online sales would also aid growth in demand.

Rising Income can be one of the key drivers for growth in consumption in India over long term. Of India's five household income categories (elite, affluent, aspirers, next billion, and strugglers), the top two income classes are the fastest growing. It is expected that, by 2025, the share of elite and affluent households will increase from 8% to 16% of the total while the share of strugglers will drop from 31% to 18%.

Source: Boston Consulting Group (BCG) – "The New Indian: The Many Facets of a Changing Consumer" dated March 20, 2017

ICICI Prudential Bharat Consumption Fund – Series 1 will aim to capture this change in spending pattern.

The Scheme intends to invest predominantly in Equities and Equity Related Securities of companies that are likely to benefit directly or indirectly from consumption and related activities. Such companies may directly or indirectly benefit from increase in consumption led demand. Illustrative list of such sectors is as under:

1. Consumer Durables
2. Consumer Non-Durables
3. Healthcare
4. Pharmaceuticals
5. Auto
6. Auto Ancillaries
7. Telecom
8. Services

9. Media & Entertainment
10. Aviation
11. Textiles
12. Fertilisers and Pesticides
13. Retailing

Sectors mentioned above are indicative in nature and the Fund Manager may invest in sectors other than these that may benefit directly or indirectly from consumption and related activities.

The scheme will be following a blend approach, a combination of value and growth, to build the portfolio. The scheme intends to invest in stocks across large cap, midcap, small cap.

As and when the fund manager is of the view that a specific investment has met its desired objective and the investment is liquidated, the proceeds may be distributed by way of dividend, subject to the availability of distributable surplus.

The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unit holders' interest.

The Scheme may invest in other schemes managed by the AMC or in the schemes of any other Mutual Funds, provided it is in conformity with the investment objective of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments and the aggregate inter-scheme investment made by all Schemes of the Fund or in Schemes under the management of other asset management companies shall not exceed 5% of the Net Asset Value of the Mutual Fund.

At present, the Scheme does not intend to enter into underwriting obligations. However, if the Scheme does enter into an underwriting agreement, it would do so after complying with the Regulations and with the prior approval of the Board of the AMC/Trustee.

The Scheme may also invest in depository receipts including American Depository Receipts (ADRs) and Global Depository Receipts (GDRs).

The Scheme may also invest in debt and money market instruments, in compliance with Regulations.

The Scheme may invest in derivatives to engage in permitted currency hedging transactions with an intention to reduce exchange rate fluctuations between the currency of the Scheme (INR) and the foreign currency exposure.

The Scheme will not have exposure to Debt Derivatives.

RISK PROFILE OF THE SCHEME:

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme Specific Risk Factors summarised below.

Scheme Specific Risk Factors and Risk Management Strategies:

In general, investment in the scheme may be affected by risks associated with equities and fixed income securities.

The Securities in the Scheme may be predominantly characterized by a stock selection where more emphasis is on value opportunity and less on earnings growth. There could be time Periods when securities of this nature may underperform relative to other stocks in the market. Value Stocks are stocks that are trading below its intrinsic or relative value which is undiscovered by the market and may take time for the market participants to identify its true potential. Hence it may take a long period of time for value of that stock to be unlocked. This could impact performance of the Scheme.

Value opportunities are generally available in the mid and small cap space; wherein majority of the companies are under-researched. Due to lack of coverage of these stocks, they usually are more volatile and illiquid than their large cap peers. Thus, relative to larger, more liquid stocks, investing in value stocks, involves potentially greater volatility and risk.

The Scheme retains the flexibility to hold from time to time relatively more concentrated investments in a few sectors as compared to plain diversified equity schemes. This may make the Scheme vulnerable to factors that may affect these sectors in specific and may be subject to a greater level of market risk leading to increased volatility in the Scheme's NAV.

The scheme being close ended its units would be listed on a stock exchange. The scheme does not guarantee a liquid and active secondary market for its units on the stock exchange and hence the units may trade at a premium or discount to its NAV.

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives.

Investing in Equities:

- Investors may note that AMC/Fund Manager's investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Schemes to make intended securities purchases due to settlement problems could cause the Schemes to miss certain investment opportunities.
- The value of the Schemes' investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and

other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Schemes may fluctuate and can go up or down.

- The Mutual Fund may not be able to sell / lend out securities, which can lead to temporary illiquidity. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.
- Investors may note that dividend is due only when declared and there is no assurance that a company (even though it may have a track record of payment of dividend in the past) may continue paying dividend in future. As such, the schemes are vulnerable to instances where investments in securities may not earn dividend or where lesser dividend is declared by a company in subsequent years in which investments are made by schemes. As the profitability of companies are likely to vary and have a material bearing on their ability to declare and pay dividend, the performance of the schemes may be adversely affected due to such factors.
- The schemes will also be vulnerable to movements in the prices of securities invested by the schemes which again could have a material bearing on the overall returns from the schemes.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the Regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. This may however increase the risk of the portfolio.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes in the securities in which it invests.
- Fund manager endeavors to generate returns based on certain past statistical trend. The performance of the schemes may get affected if there is a change in the said trend. There can be no assurance that such historical trends will continue.
- In case of abnormal circumstances it will be difficult to complete the square off transaction due to liquidity being poor in stock futures/spot market. However fund will aim at taking exposure only into liquid stocks where there will be minimal risk to square off the transaction. The Schemes investing in foreign securities will be exposed to settlement risk, as different countries have different settlement periods.
- The schemes are also vulnerable to movements in the prices of securities invested by the schemes which again could have a material bearing on the overall returns from the schemes. These stocks, at times, may be relatively less liquid as compared to growth stocks.
- Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Schemes or business prospects of the Company in any particular sector.

Risks associated with transaction in units through stock exchange mechanism

Units of the Schemes will be traded on BSE or any other recognised stock exchange. Debit/Credit of Units in investor's demat account on any Business Day will depend upon the order processing/settlement by BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange shall be governed by the operating guidelines and directives issued by BSE or such other recognised exchange in this regard.

Risk associated with close ended Schemes:

A close ended Scheme endeavors to achieve the desired returns only at the scheduled maturity of the Scheme. Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock exchange mode, if they have opted to hold Units in a demat form, by mentioning their demat details on the NFO application form. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. Hence, Unit Holders who sell their Units in a Scheme prior to maturity may not get the desired returns.

Although the securities in the portfolio will have high market liquidity, there is a possibility that market liquidity could get impacted on account of company/sector/general market related events and there could be a price impact at maturity while liquidating the portfolio.

Risk Factors associated with Thematic Schemes:

Investing in thematic schemes is based on the premise that the Scheme will seek to invest in companies belonging to a specific sector / theme. This will limit the capability of the Scheme to invest in other sectors / theme.

These Schemes would invest in equity and equity related securities of companies engaged in the particular sector / theme and hence concentration risk is expected to be high.

Also, as with all equity investing, there is a risk that companies in that specific sector / theme will not achieve its expected earnings results, or that an unexpected change in the market or within the company will occur, both of which may adversely affect investment results. Thus investing in a sector /theme specific scheme could involve potentially greater volatility and risk.

Risk associated with Listed Schemes:

Investors who hold units in demat form and wish to exit/redeem may do so through the stock exchange mode. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. Hence, Unit Holders who sell their Units in a Scheme on the exchange may not get the desired returns.

Absence of Prior Active Market

Although the scheme will be listed on stock exchange, there can be no assurance that an active secondary market will develop or be maintained.

Risk management strategies: The Scheme by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity and debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Scheme has identified following risks of investing in equity and debt Securities and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk and Description	Risk mitigants / management strategy
Risks associated with Equity investments	
Market Risk: The scheme is vulnerable to movements in the prices of securities invested by the scheme, which could have a material bearing on the overall returns from the scheme.	Market risk is a risk which is inherent to an equity scheme. The Scheme may use derivatives to limit this risk.
Liquidity Risk: The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.	The liquidity of stocks that the Scheme invests into could be relatively low. The Scheme is a Close Ended Scheme and as such daily liquidity requirements are inherently not present. The Scheme will try to maintain a proper asset-liability match to ensure redemption / maturity payments are made on time and not affected by illiquidity of the underlying stocks.
Concentration Risk: Concentration risk represents the probability of loss arising from heavily lopsided exposure to a particular group of sectors or securities.	The Scheme will try and mitigate this risk by investing in sufficiently large number of companies so as to maintain optimum diversification and keep stock-specific / sector-specific concentration risk relatively low.
Derivatives Risk: As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds.	Derivatives will be used for the purpose of hedging/ portfolio balancing purposes or to improve performance and manage risk efficiently. Derivatives will be used in the form of Index Options, Index Futures, Stock Options and Stock Futures and other instruments as may be permitted by SEBI. All derivatives trade will be done only on the exchange with guaranteed settlement. No OTC contracts will be entered into.

Risks associated with Debt investments	
Risks and description	Risk mitigation strategy
Market Risk/ Interest Rate Risk: As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.	The scheme will undertake the active portfolio management as per the investment objective to reduce the market risk. In a rising interest rates scenario the scheme will increase its investment in money market securities whereas if the interest rates are expected to fall the allocation to debt securities with longer maturity will be increased thereby mitigating risk to that extent.
Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).	The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be relatively high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The Scheme will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.

Credit Risk: Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).	Management analysis will be used for identifying company specific risks. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower. In case of securitized debt instruments, the Scheme will ensure that these instruments are sufficiently backed by assets.
Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.	Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.

For Equity and Debt Investment	
Risks and description	Risk mitigation strategy
Currency Risk: The Schemes will invest in foreign securities as permitted by the concerned regulatory authorities in India. Since the assets will be invested in securities denominated in foreign currency (US\$), the INR equivalent of the net assets, distributions and income may be adversely affected by changes / fluctuations in the value of the foreign currencies relative to the INR.	The scheme subject to applicable regulations shall have the option to enter into forward contracts for the purposes of hedging against the foreign exchange fluctuations. The Schemes may employ various measures (as permitted by SEBI/RBI) including but not restricted to currency hedging (such as currency options and forward currency exchange contracts, currency futures, written call options and purchased put options on currencies and currency swaps), to manage foreign exchange movements arising out of investment in foreign securities. All currency derivatives trade, if any will be done only through the stock exchange platform.

There shall be no transaction charge on subscription below Rs. 10,000/- and on transactions other than purchases/ subscriptions relating to new inflows.

However, the option to charge "transaction charges" is at the discretion of the distributors. Investors may note that distributors can opt to receive transaction charges based on 'type of the Scheme'. Accordingly, the transaction charges would be deducted from the subscription amounts, as applicable.

Transaction charges shall also be deducted on purchases/subscriptions received through non-demat mode from the investors investing through a valid ARN holder i.e. AMFI Registered Distributor (provided the distributor has opted-in to receive the transaction charges) in respect of transactions routed through Stock Exchange(s) platform viz. The aforesaid transaction charge shall be deducted by the Asset Management Company from the subscription amount and paid to the distributor, as the case may be and the balance amount shall be invested in the relevant scheme opted by the investor.

However, upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by such distributor.

Transaction Charges shall not be deducted if:

- Purchase/Subscription made directly with the fund through any mode (i.e. not through any distributor/agent).
- Purchase/ subscription made in demat mode through stock Exchange, irrespective of investment amount.

CAS/ Statement of account shall state the net investment (i.e. gross subscription less transaction charge) and the number of units allotted against the net investment.

- In the case of joint holding in a folio, the first named Unit holder shall receive the CAS/account statement. The holding pattern has to be same in all folios across Mutual Funds for CAS.

Further, in case if no transaction has taken place in a folio during the period of six months ended September 30 and March 31, the CAS detailing the holdings across all Schemes of all mutual funds, shall be emailed at the registered email address of the unitholders on half yearly basis, on or before tenth day of succeeding month, unless a specific request is made to receive the same in physical form.

Each CAS issued to the investors shall also provide the total purchase value/ cost of investment in each scheme.

Further, CAS issued for the half-year (September/ March) shall also provide:

- The amount of actual commission paid by AMCs/Mutual Funds (MFs) to distributors (in absolute terms) during the half-year period against the concerned investor's total investments in each MF scheme. The term 'commission' here refers to all direct monetary payments and other payments made in the form of gifts / rewards, trips, event sponsorships etc. by AMCs/MFs to distributors. Further, a mention may be made in such CAS indicating that the commission disclosed is gross commission and does not exclude costs incurred by distributors such as Goods and Services Tax (wherever applicable, as per existing rates), operating expenses, etc.
- The scheme's average Total Expense Ratio (in percentage terms) for the half-year period for each scheme's applicable plan, where the concerned investor has actually invested in.

Such half-yearly CAS shall be issued to all MF investors, excluding those investors who do not have any holdings in MF schemes and where no commission against their investment has been paid to distributors, during the concerned half-year period.

- Consolidation of account statement shall be done on the basis of Permanent Account Number (PAN). In case of multiple holding, it shall be PAN of the first holder and pattern of holding. The CAS shall be generated on a monthly basis.
- If there is any transaction in any of the Demat accounts of the investor or in any of his mutual fund folios, depositories shall send the CAS within ten days from the month end. In case, there is no transaction in any of the mutual fund folios and demat accounts then CAS with holding details shall be sent to the investor on half yearly basis.
- In case an investor has multiple accounts across two depositories, the depository with whom the account has been opened earlier will be the default depository.

The dispatch of CAS by the depositories would constitute compliance by the AMC/ the Mutual Fund with the requirement under Regulation 36(4) of SEBI (Mutual Funds) Regulations.
